## Credentials with a meaning -

from the PPA. The world's most respected professional photography organization.

**Master degrees** are earned with a significant portion of the credits from International Competition while the Craftsman degree is earned primarily through the voluntary giving education and service to others.

**Certified Professional Photographer** rating is earned by successful passing testing of in-depth photographic knowledge and is maintained through continuous education.

**Certified Drone Photographer** status is given only to FAA-certified Part 107 UAS (drone) pilots who've also passed rigorous testing in the special photographic aspects of using what is essentially a flying camera. The rating is maintained only by continuous recertification of the base FAA Part 107 certificate.

Someone special, for your most special day.
